

VENKATESH RATHOD

Yadgir, Karnataka | +91 8310396966 | rathodvenky538@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Java Full Stack Developer with 9 months of experience in the banking and financial services (Fintech)domain, skilled in **Core Java, Spring Boot, Spring MVC, JDBC, REST APIs, Oracle Database, HTML, CSS, JavaScript, and React.js**. Experienced in developing secure payment gateway applications, including merchant integration, 3D Secure (3DS), ISO 8583 message processing, payment authorization, reconciliation, and chargeback management. Passionate about building scalable Java Spring Boot Microservices applications and eager to contribute to enterprise-level backend development.

TECHNICAL SKILLS

Core Java & Backend: Java, J2EE, Spring Framework, Spring MVC, Spring Boot, Spring Data JPA, Microservices, Hibernate, JDBC, Servlets, JSP

API & Integration: REST API design & integration, Postman, third-party/merchant system integration

Databases: Oracle SQL, MySQL, PostgreSQL, SQL query optimization

Frontend: HTML5, CSS3, JavaScript, React.js (Basic), Bootstrap, Responsive Web Design

Tools & Practices: Git, GitHub, Bitbucket, Jira, Maven, Eclipse/STS/IntelliJ/VS Code, Apache Tomcat, Agile/SDLC, Docker, EDB17, Code Reviews

PROFESSIONAL EXPERIENCE

Software Engineer — Financial Software and Systems (FSS), Chennai

Oct 2025 – Present

Payment Gateway Project

- Developed and maintained backend modules using **Core Java, Spring MVC, JDBC, JSP, REST APIs and Oracle Database** to support secure, high-volume payment transaction processing, including merchant integration, 3D Secure (3DS) authentication, **ISO 8583** message handling, and payment authorization workflows.
- Built request/response handling between merchants, payment gateways, and banking systems, implementing authentication and authorization mechanisms to safeguard financial transactions.
- Participated in debugging, SIT, UAT, and production support activities, ensuring application stability, performance, and high availability of finance-critical systems.

Extraction and Reconciliation System

- Developed and maintained backend services using **Java, Spring Boot Microservices, REST APIs, JSP, and Oracle Database** for the **Extraction** and **Reconciliation** modules.
- Designed and integrated **RESTful APIs**, implemented approval workflow and pagination features, and supported seamless communication between business modules.
- Wrote and optimized **Oracle SQL** queries, analyzed transaction data, fixed application defects, and resolved production issues to improve system performance and reliability.
- Participated in Testing, deployment, and production support, collaborating with QA and business teams to ensure accurate transaction processing and successful application releases.

Java Full Stack Development — ExcelR, Bengaluru

Feb 2025 – Mar 2025

- Developed web applications using Java, Spring Boot, MySQL, HTML, CSS, and React.js.
- Implemented REST APIs, CRUD operations, and authentication features within an MVC architecture.
- Built responsive UI components and collaborated in an Agile team setting.

EDUCATION

Bachelor of Engineering (B.E) – Computer Science & Engineering

Visvesvaraya Technology University, Belagavi, Karnataka **CGPA–8.5/10**

2021 – 2025

CERTIFICATIONS

- Full Stack Web Development – ExcelR Solutions, Bengaluru
- Web Design and Development – ParvaM ConsulTech Pvt. Ltd, Bengaluru
- AI / ML Engineer – ROOMAN Technologies, Bengaluru
